This will be achieved through a conceptual and practical understanding of the narrative process.</p> <p>You will learn, whilst working individually and collaboratively, important skills that will both develop your own practice as well as giving you key insights into other areas of visual communication. In turn, this will help improve your understanding of contemporary practice in the creative industries.</p> <p>Building on a strong foundation of the symbiotic relationship of people and identity you will be engaged with a series of challenges that further your understanding of these relationships and how they can influence experiential design.</p> <p>Through a combination of technical and conceptual workshops, tutor-led and peer group learning, external input and creatively challenging tasks you will effectively work towards a final outcome that will help you to develop into an original and innovative practitioner.</p>

<p>The module will consist of a combination of lectures, workshops, presentations and tutorials; introducing you to the contextual themes that underpin your discipline whilst focussing on the acquisition of new knowledge and skills to support your practice.</p> <p>The focus of the level will be to transform you from a prescriptive learner to an active learner.</p>
