Module Specification

Module Summary Information

1	Module Title	Foundation Practice Project
2	Module Credits	20
3	Module Level	3
4	Module Code	BUS3006

5	Module Overview

The Foundation Practice Project module is a practical piece of extended work related to your chosen degree. It will require you to apply the knowledge and skills developed throughout your current level of study and will enhance your ability to work individually and as part of a team. During the project you will be given the space, time and facilities to support deeper appreciation for your specialisation and you will be encouraged to demonstrate creativity in the design, planning and execution of a project.

Within the module there will be a combination of teamwork and self-directed study so as to foster a culture of innovation and collegiality that will significantly benefit your transition to degree studies and the learning and teaching philosophy of your chosen degree pathway. Through working with your peers and in addition to regular contact with an assigned supervisor, the module enables you to negotiate your learning and will directly contribute to your professional development and appreciation of how others work.

6	Indicative Content

- Key definitions and basic of project management terms
- Importance and application of PM
- Examples of good project
- Role of project manager.
- Tools and software's for PM – Gantt Chart, WBS
