

Module Specification

Module Summary Information

1	Module Title	Individual Project
2	Module Credits	20
3	Module Level	4
4	Module Code	BNV4113

5	Module Overview
<p>The ability to define, plan and undertake a project is a critical set of skills needed in various roles within the construction industry. Identifying appropriate information and analysing this, to formulate clear results or recommendations, is required to underpin many of the processes that inform construction projects.</p> <p>The aim of this unit is to support students in using and applying the knowledge and skills they have developed through other areas of their studies to complete and present an individual project. In addition, this unit will provide students with key study skills that will support them in further study.</p> <p>Resources for learning, teaching and assessment will all be available on the university virtual learning environment (VLE), Moodle. Delivery will be by a series of lectures, practical classes and workshops all teaching space-based. Assessment will be based on an individual report and presentation responding to one or more tasks, formative feedback will be given during the practical classes and workshops.</p>	

6	Indicative Content
<p>Students will be able to identify, define, plan, develop and execute a successful project by working through a clear process. They will develop a project brief; outlining a problem that requires a solution, as well as a project specification, the specific requirements of which the final outcome must meet. They will research the problem, undertaking a feasibility study, and consider a range of potential solutions using critical analysis and evaluation techniques to test, select and contextualise their preferred solution. Students will provide a work and time management plan, keeping a diary of all activities, reflecting on their process and their learning throughout the project.</p>	

7	Module Learning Outcomes
On successful completion of the module, students will be able to:	
1	Prepare project that will provide a solution to an identified problem.
2	Demonstrate the process of the project within agreed timescales and specification; documenting the process throughout.
3	Discuss potential project management solutions.
4	Produce a project report and deliver a presentation of the final project outcomes.

8 Module Assessment			
Learning Outcome			
	Coursework	Exam	In-Person
1-4	X		
4			X

9 Breakdown Learning and Teaching Activities	
Learning Activities	Hours
Scheduled Learning (SL) includes lectures, practical classes and workshops, peer group learning, Graduate+, as specified in timetable	48
Directed Learning (DL) includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning, as directed on VLE	60
Private Study (PS) includes preparation for exams	92
Total Study Hours:	200
