

## Module Specification

### Module Summary Information

<b>1</b>	<b>Module Title</b>	Long Term Conditions
<b>2</b>	<b>Module Credits</b>	20
<b>3</b>	<b>Module Level</b>	4
<b>4</b>	<b>Module Code</b>	HSC4089

<b>5</b>	<b>Module Overview</b>
<p>This module aims to enable you to identify the difference between acute and chronic disease. You will explore the range of chronic diseases that will have a holistic impact upon individuals in the long term. It will also enable you to consider your own role in the care of such individuals.</p> <p><b>Alignment with Philosophy and Aims</b> The Foundation Degree Health and Social Care programme is committed to developing workers who will be compassionate, caring, knowledgeable and productive members of inter-professional teams, with the ability to be adaptable and flexible in order to respond to the ever changing needs and priorities of the services we support. During this Module you will investigate role the knowledge and skills required to support your individual working roles and therefore benefit your service users. You will develop into an individual that can influence the quality of care delivered and disseminate good practice within your organisation</p> <p><b>Learning and Teaching Strategy</b> The teaching and learning approaches are designed to maximise the benefits of sharing knowledge and expertise in the classroom. Lectures for this module will consist of an overview of the module, searching and research skills and discussions on the content of the assessment. The majority of the module teaching hours will be tutorial time with the module tutor to negotiate the content of the chosen topic and completion of the poster presentation.</p> <p><b>Assessment Strategy</b> This module comprises of one item of summative assessment: Written assignment, 3000 words.</p>
