

Module Specification

Module Summary Information

1	Module Title	Nursing in Society
2	Module Credits	30
3	Module Level	5
4	Module Code	NUR5064

5	Module Overview
<p>Relationship with Programme Philosophy and Aims</p> <p>This module aims to prepare students to develop their knowledge, skills and professional values to deliver high quality essential and complex care to all service users. It is concerned with human experiences as individuals, families, groups, and communities across the life span.</p> <p>The module aims to develop students' understanding of how peoples' lifestyles, environments and the location of care delivery influence their health and wellbeing. The module will explore the principles of nursing in practice to design and deliver individualised care. The aim is to develop nurses with the ability to ensure the delivery of high quality care in changing environments, in a sensitive and person-centred manner.</p>	

6	Indicative Content
<p>A family - centred approach to care delivery based on a scenario based learning</p> <p>Protection of vulnerable people including safeguarding children and POVA</p> <p>Lifestyle Issues and related physiology as applied to the scenario e.g. Sexual Health Issues, offender health etc.</p> <p>Diversity and equality and the impact on health across the existing demography</p> <p>Partnership working with the service user, carers and families and health and social care professional and agencies, including the voluntary sector, to facilitate shared decision making and shared care</p> <p>The importance of evidence based practice to inform ethical and legal decision making</p> <p>The nursing process and application to care to include principles of assessment, planning, communication and record keeping.</p> <p>The principles of public health to recognise and respond to social determinants of health, illness and health inequalities underpinned by National and International Government Policies.</p> <p>The professional issues involved in care delivery outside of a hospital environment e.g. lone working, discharge planning, intermediate care etc.</p>	

7		Module Learning Outcomes	
On successful completion of the module, students will be able to:			
	1	Analyse the role and responsibilities of the nurse working in partnership with other service providers caring for individuals across the lifespan within groups, communities and populations.	
	2	Evaluate how government policies, both national and international, drive the delivery of care.	
	3	Analyse the evidence base for assessing and planning complex care acknowledging the impact of the care location.	
	4	Demonstrate an understanding of the public health priorities in order to recognise and respond to social determinants of health.	
	5	Demonstrate an understanding of the care required by pregnant women and families during pregnancy and after child birth.	
	6	Demonstrate how the attitudes knowledge and skills developed within the module will inform practice.	

8		Module Assessment		
Learning Outcome		Coursework	Exam	In-Person
1 – 6		X		

9		Breakdown Learning and Teaching Activities	
Learning Activities		Hours	
Scheduled Learning (SL) includes lectures, practical classes and workshops, peer group learning, Graduate+, as specified in timetable		40	
Directed Learning (DL) includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning, as directed on VLE		80	
Private Study (PS) includes preparation for exams		180	
Total Study Hours:		300
